

Recycled Plastic 8 x 4 Sheet

(2.440mm x 1.220mm)

EKOply is manufactured from 100% waste plastic which typically ends up being land-filled or incinerated. EKOpoly has been manufactured as an alternative to imported plywood, or to virgin plastic panels, yet in turn are fully recyclable at end-of-life.

EKOply is offered in 12.5mm and 19mm thickness with the option of an anti-slip surface on 19mm only. Colour options include Standard Grey, Blue, Green, White Fleck. It is also one of the most environmentally friendly options available, requiring little or no maintenance.

Key Benefits of EKOpoly

- Rigid sheet available in 19mm & 12.5mm
- Anti-Slip & coloured options available
- It can be cut/screwed in the same way as traditional timber
- Significantly longer lasting compared to timber and plywood
- Rot and weatherproof
- Tough and durable
- No maintenance costs
- Chew resistant and non-toxic to animals.

FAQ and technical datasheets are available on request.

*As recycled sheets, there are different shades produced depending on the waste plastic used in production.

"We found EKOpoly perfect.

No painting, zero maintenance and can't rot. It was easy to cut and looks good.

Great product ticked all the boxes"

Simple to clean animal housing

"Setting ethical standards by use of promoting an excellent example of sustainable recycling" *Isle of Wight Zoo*

Used in living wall applications, in constant moisture

"The sheets worked very well. There are 29 panels on the roof ... with sheets supporting a total of 4.5 tonnes of ballast blocks within the frames. We will certainly use these again."

Chris at Craven Energies

"EKOpoly has provided us with an exciting sustainable alternative to standard plywood. On site, when the furniture arrived and before we'd even finishing installing it, there was a real buzz about the project, with people enjoying and climbing all over the installation. It was an easy choice to work with EKOpoly, everything in the East Village (former Olympic Village) has been selected for it's sustainable and environmental credentials, the recycled plastic sheet helped us to continue this ethos as part of our design."

Will, The Edible Busstop.

Anti-Slip floor used in a container

Standard sheet used in roof terrace application
